

Invention Art Project

Medium - Colored Pencil or Pencil, iPad

Schedule - 1-2 Days to Brainstorm
2 Days to draw and color
1 Day in iPad

Directions-

For this project, you will be inventing something and drawing it. This invention has to be something that serves a purpose or assists in a task of some sort. Your invention could be an improvement upon current things that already exist, or it could be something completely new and "space aged".

You will be graded on the creativity of your idea, the quality of the drawing and coloring, your classroom effort, and on the quality of the write up for the project.

Some ideas on how to make a creative invention include:

1. Mixing two current technologies (an electric toothbrush and a cell phone)
2. Improving upon a current technology (A car that flies, or a TV remote that beeps in case you lose it).
3. Taking an idea from movies or TV and modifying it (Robots, light sabers, ray guns)
4. Creating your own unique idea

Invention Art Grading Criteria

Creativity

Effort

Coloring

Realism (3-D shading)
